

# BRAINFUCK PDF COMPILER

Code Editor:

Standard Input (Stdin):

Console Output:

Created in 1993 by Urban Müller, Brainfuck operates on an array of memory cells using 8 simple commands.

## COMMAND CHEATSHEET

|   |                               |
|---|-------------------------------|
| > | Move pointer to the right     |
| < | Move pointer to the left      |
| + | Increment the current cell    |
| - | Decrement the current cell    |
| . | Output character at pointer   |
| , | Input char (Reads from Stdin) |
| [ | Jump forward if cell is 0     |
| ] | Jump back if cell is not 0    |
